

? Questions ?

📖 Instructions 📖

⚠️ Read the questions carefully ⚠️

⚠️ make sure to discuss all questions ⚠️

Section 1 You are required to create a form and the form have

→ First name label and input tag

→ Last name label and input tag

🔔 The above fields are required and should not be empty and should validate for number existence anywhere or in between the text.

😊 hint: you can use HTML tag inline or function based validation

→ Email label and input tag

🔔 Should not be empty and validity should be checked for being email

→ Password label and input tag

🔔 Minimum eight and maximum 10 characters, at least one uppercase letter, one lowercase letter, one number, and one special character

→ Confirm password label and input tag

🔔 Password should match with confirm password

→ button for submitting with text of "Register"

🌟 TRY to implement Regular expression for better validation(Optional)

Section 2 After submission

👉 after all , if all validation are fulfilled , clear the input tag, and show the result after hiding the form which says " Thank you for registering Mr "fullName"

Css styling

→ position the form to be at the center of the screen

→ input tag should have border radius of 10px

→ The background color should be tomato

→ for the form give a class of "form"

→ give the background of blue for the button with border radius of 15px with a bold appearance solid

🕒 1:30 hr 🕒
