

? Questions ?

📖 Instructions 📖

- ⚠️ Read the questions carefully ⚠️
- ⚠️ make sure to discuss all questions ⚠️
- ⚠️ you are only required to create a database, connect your database, and insert functionality only. No need for frontend ⚠️
- ⚠️ remember to install updated MySQL module eg: mysql2 ⚠️
- ⚠️ you can use any implicative name for routing ⚠️
- ⚠️ if everyone in the group understood how to create and connect the database along with inserting, you can further do a discussion on how to update and delete already inserted data ⚠️

1 you are asked to prepare a database for a book shop, the owner wants a database to store information which includes book title, book genre, author name, and year of publication. Create a database for the owner to insert the following information.

💻 Happy coding 💻
