😊 All images are available in the Resource folder. Please unzip the folder and make use of the provided images.

2️⃣ From your exercise cloning the Apple page, extract only the header section and incorporate it into your Apple Watch page.

😊 Hint: While copying and pasting, ensure to include your CSS styling for the header. Place the copied header section above the three Apple Watch sections you've already constructed.

Make sure to include the Font Awesome CDN, which you utilized in your Apple homepage clone, to ensure proper rendering of icons in the header section you're incorporating into your Apple Watch page.
